

Manage greenhouses / plots

Explanation of business facilities

Part	Description
Business organization	This is the legal entity of an organization, which is almost always based on a Chamber of Commerce (KVK) number. A business organization has an Organization GLN code.
Branch	A branch is a physical location (business establishment) of the organization to which multiple business objects are linked. These business objects fall under the same Chamber of Commerce establishment number. A branch has a location GLN code.
Greenhouse/plot	A greenhouse/plot is a business object or a parcel of agricultural land (including an orchard) linked to a branch. Each greenhouse/plot has its own location GLN code.
Department	A department refers to a specific, demarcated area within a greenhouse/plot intended for growing a specific crop or carrying out certain cultivation activities.
Path	A path is a corridor or passage between growing beds or rows of plants.
Cultivation plan	A cultivation plan is an actual cultivation that took place in a business object (e.g., a greenhouse, cultivation cell complex, etc.) or a parcel of agricultural land.

For each path, indicate whether it is to the left or right of the concrete path.

If you have one path on the left and one on the right, create two paths.

Or download a template to fill out in Excel.

1. Download the Excel template and fill it out in Excel.
2. Select the document and upload the completed template.
3. Select "Upload file to GQ data."

Indicate for each path whether it is to the left or right of the concrete path. This works with 1 and 0 for each side of the path. 1 is true, 0 is false. If you have a path with one left and one right, then create two paths. See the example for path 103. If you don't use Left and Right, then enter 1 for both. See the example for path 104.

	A	B	C	D
	Padnummer / Pathnumber	Pad oppervlakte M2 / Patharea M2	Pad Links / Path Is Left (1 = true / 0 = false)	Pad Rechts / Path Is Right (1 = true / 0 = false)
