

Cultivation plan management

Explanation of business facilities

Part	Description
Business organization	This is the legal entity of an organization, which is almost always based on a Chamber of Commerce (KVK) number. A business organization has an Organization GLN code.
Branch	A branch is a physical location (business establishment) of the organization to which multiple business objects are linked. These business objects fall under the same Chamber of Commerce establishment number. A branch has a location GLN code.
Greenhouse/plot	A greenhouse/plot is a business object or a parcel of agricultural land (including an orchard) linked to a branch. Each greenhouse/plot has its own location GLN code.
Department	A department refers to a specific, demarcated area within a greenhouse/plot intended for growing a specific crop or carrying out certain cultivation activities.
Path	A path is a corridor or passage between growing beds or rows of plants.
Cultivation plan	A cultivation plan is an actual cultivation that took place in a business object (e.g., a greenhouse, cultivation cell complex, etc.) or a parcel of agricultural land.
