

# Use registrations

# Explanation use registrations

In GreenlinQdata, we distinguish 4 types (themes) of use registrations:

- Crop protection. Registrations of authorized chemical crop protection applications.
- Fertilizers. Registrations of fertilizer applications.
- Biological control. Registrations of deployed beneficial organisms.
- Other products. This category includes applications that do not fall under the above categories.

The system automatically checks whether sufficient stock is available when saving a registration. If the stock is insufficient or missing, the user will be prompted to supplement the stock after saving.

## Registration completed - product (s) in the min

Because of this registration, one or more products are now in your pantry with a negative stock.  
Perhaps because you have purchased new stock, but had not yet incorporated it in your pantry. Do you want to supplement your stock now?

No, not supplement

Yes, supplement stock

## Explanation:

After saving a use registration, the system checks if the product is in stock. If there is a shortage, a message will be displayed.
